

PUMPKIN CARVING GUIDE

Complete Steps 1-3 before the pumpkin carving workshop:

1. Using a knife, cut out and remove the area around the stem of the pumpkin. Make sure to save it for later.
2. Use a spoon to scoop out the pumpkin seeds from the interior of the pumpkin. (You can save these for roasting!)
3. Print out the design that you want to carve and use toothpicks to attach the paper onto the face of your pumpkin.

Complete Steps 4-6 during the carving workshop:

4. Use a small serrated knife to carve out the black shapes in the design. Always cut away from yourself!
5. When all of the pieces have been cut out, remove them from the pumpkin.
6. To finish your jack-o-lantern, put a tealight inside of the pumpkin and put the top back on!
