## PUMPKIN CARVING GUIDE

## Complete Steps 1-3 before the pumpkin carving workshop:

- 1. Using a knife, cut out and remove the area around the stem of the pumpkin. Make sure to save it for later.
- 2. Use a spoon to scoop out the pumpkin seeds from the interior of the pumpkin. (You can save these for roasting!)
- Print out the design that you want to carve and use toothpicks to attach the paper onto the face of your pumpkin.

## Complete Steps 4-6 during the carving workshop:

- 4. Use a small serrated knife to carve out the black shapes in the design. Always cut away from yourself!
- 5. When all of the pieces have been cut out, remove them from the pumpkin.
- 6. To finish your jack-o-lantern, put a tealight inside of the pumpkin and put the top back on!
